PROJECTS

CLEARERPAY OTC PORTAL (08/2025 - Present)

- **Leading the Frontend development of an OTC (Over-the-Counter) trading portal**, enabling secure customer onboarding, settlement account management, and trade execution workflows.
- **Building a React-based frontend** with dynamic forms, modals, and dashboards to handle real-time transaction entry across debit, credit, and FX instruments.
- **Implemented a React-based UI** with dynamic modals, dropdowns, and forms to support debit, credit, and FX transaction types.

CLEARPAY ADMIN PORTAL (07/2025 - Present)

- Building an **admin portal for a payment platform** with React to streamline user and transaction management.
- Designed **reusable, responsive UI components** for onboarding, account setup, and monitoring transactions.
- Improved **efficiency and usability** with dynamic forms, modals, and real-time data handling.

CLEARERPAY WEBSITE www.clearerpay.com (06/2025 - Present)

- Enriched and updated website content by developing and integrating new features using **TypeScript** and **Next.js**, ensuring robust, type-safe, and scalable code.
- **Performance Optimization:** Improved website speed and efficiency by optimizing React components, resulting in faster load times, reduced bundle sizes, and enhanced SEO performance.
- **Responsive Design Implementation:** Built and integrated responsive layouts using *React* and *Next.js* to ensure seamless user experience across all devices and screen sizes.

KPMG ACE | FRONTEND DEVELOPER (02/2023 - 06/2023)

- The app uses a client-server architecture. The user interface (client side) was built with HTML, CSS, JavaScript, and React.
- The KPMG Ace web app speeds up manufacturer sourcing and provides suppliers a platform to showcase their offerings to potential clients.
